

ARTERIAL MANAGEMENT

ARTERIAL MANAGEMENT

District Six manages selected arterial roadways to improve mobility and safety along roadways and construction work zones in Miami-Dade and Monroe County. It also manages operations and maintenance of traffic signals and devices along US 1 in the Florida Keys. The goal is to deliver a sound transportation network.

ADAPTIVE SIGNAL CONTROL

FDOT District Six along with partner agencies are actively managing arterial corridors outfitted with Adaptive Signal Control Technologies. These technologies are working to optimize signal timing to increase the efficiency of existing roadways and promote safety.

ARTERIAL RISK

Rapid Incident Scene Clearance (RISC) services are offered along arterial roadways that are known to carry a large number of trucks and commercial vehicles. This service helps expedite incident clearance along these critical roadways to promote safety and mobility.
