

TRAVELER INFORMATION

511 TRAVELER INFO

The 511 Traveler Information System provides users with up-to-the-minute traffic alerts 24 hours per day, 7 days per week. Users can access the services' phone system, website, mobile application and twitter account to learn about traffic conditions and avoid delays.

SOCIAL MEDIA

FDOT uses social media as an additional publication tool in its traveler information toolbox. The agency uses several platforms to post both planned transportation events as well as real-time traffic conditions to help drivers make informed decisions about their trip planning choices. These platforms include Facebook, You Tube and Twitter.

DMS

Dynamic Message Signs (DMS) are electronic signs located along highway and arterial roadways to inform drivers of real-time traffic conditions that may impact traffic. Traffic operators at the SunGuide Transportation Management Center update the signs with traffic alerts and safety campaigns to help drivers avoid delays and promote awareness.
