FDOT

DISTRICT SIX INCIDENT MANAGEMENT EFFORTS SEE GROWTH, MORE RESPONSIBILITIES

The District Six TSM&O Program has experienced tremendous growth in the past few years. As traffic volumes increased, the District's TIM Team has expanded the reach of its incident management services to meet the regional demand of Miami-Dade and Monroe Counties.

The team has always maintained a proactive approach to incident clearance. However, recent traffic trends have prompted the role of incident managers to evolve. The program is playing a bigger role in supporting local agencies and municipalities to maintain public safety during planned events, unplanned events and emergency situations.

Key to this program's growth has been the district's approach to

The program is playing a bigger role in supporting local agencies and municipalities...

building a community around incident management. The District holds six meetings throughout the year to inform partners about the latest clearance procedures, exchange best practices, and promote dialogue among the partners.

District Six has worked with several partners to coordinate traffic monitoring and maintenance of traffic for high traffic generating events. In 2021, it worked with the City of Miami Beach to assist with both Memorial Day weekend and Spring Break, two of the city's busiest events. In Monroe County, it supported the annual Seven Mile Bridge Run.

Road Rangers continued to support state roadways during the COVID-19 pandemic by adjusting to changing traffic levels and retooling their approach to provide motorists safe and socially

distanced service. This year has shown how District Six's approach has improved regional quality of life beyond its incident management needs.

FDOT D6 HOSTED MONROE COUNTY TIM MEETING IN JUNE

The District Six Transportation Systems Management and Operations (TSM&O) Office hosted its biannual meeting for the Monroe County Traffic Incident Management (TIM) team at the end of June. The goal is to bring local partners together to discuss the issues unique to Monroe County and promote interagency coordination in the area.

The virtual meeting provided partner agencies with an update about the area's traffic and incident management initiatives, such as the Rapid Incident Scene Clearance Program on US 1 and the upcoming Connected and Automated Vehicles Pilot Project, called Keys COAST. The meeting also covered the District's hurricane response and coordination plans which is especially important since the area only has a one-way in, one-way out evacuation route.

TIM meetings work to strengthen the incident management community and better serve Monroe County.

RISC STATS

District Six implemented the Rapid Incident Scene Clearance (RISC) Program in 2009 to reduce the impact of large-scale traffic events along our roadways.
The program covers: Interstates 75, 95, 195, 395, State Road 826, Krome Avenue, Okeechobee Road, the MacArthur Causeway, and US-1 in Monroe County.
